Professional Summary

Results-driven software developer and former operations leader with a decade of experience managing teams of up to 30 employees. Transitioning into AI and software engineering, I bridge the gap between complex operational management and technical implementation. Dedicated to building scalable web applications and developing AI-driven solutions using modern JavaScript frameworks and cloud architecture.

Technical Skills

- **Frontend & Web Development:** React, Next.js, TypeScript, JavaScript, HTML5, CSS, Vite.
- **Backend & Cloud:** Firebase, Firestore, ASP.NET Core, C#, Microsoft SQL Server.
- **AI & Systems:** Local LLM configuration and optimization, systems design, and data structure/algorithm implementation.
- **Tools & Methodologies:** Git, Test-driven development, RESTful API design, Agile project management.

Key Projects

- **Summarist (Next.js Application):** Architected and deployed a full-stack application using Next.js and Firebase; integrated Stripe for payment processing and configured environment-specific security protocols.
- **AI Resume Builder:** Developed a React-based application focused on dynamic content generation and state management.
- **Blogger App API:** Engineered a robust backend API utilizing C#, ASP.NET Core, and Entity Framework, featuring custom role-based authorization and Microsoft SQL Server integration.

Professional Experience

Zeeks Pizza | Seattle, WA

Operations Manager | 2015 – 2025

- Led teams of up to 30 staff, focusing on operational efficiency, process optimization, and data-driven resource allocation.
- Managed multi-faceted business workflows, including inventory logistics, vendor coordination, and financial reporting, consistently meeting strict performance KPIs.

- Leveraged strong analytical and logical thinking to troubleshoot operational bottlenecks, significantly improving team productivity and service delivery.

Zimmer Biomet | Bellevue, WA

Surgery Coordinator | 2013 – 2015

- Managed high-stakes scheduling and quality assurance for surgical implants, requiring rigorous attention to detail and adherence to strict safety specifications.
- Facilitated complex data reconciliation and billing processes, ensuring 100% accuracy in highly regulated healthcare environments.

Education & Certifications

- **Software Engineering Certificate** | Frontend Simplified Institute
- **Core Competencies:** Data Structures & Algorithms, Systems Design, Design Patterns
